MEMORANDUM: 19-023

DATE: May 14, 2019

TO: L-37-1 Surveillance Panel

FROM: Dylan Beck

SUBJECT: L-37-1 Hardware Reporting Requirements

     Due to testing on a new hardware batch distinction is now needed on uploaded L-37-1 test reports to determine the correct targets are used for each hardware batch. Please submit reports with the "Batch" field filled out on Form 1. For the current approved hardware batch the identifier "04-2014" should be used in the field. For hardware batches not yet approved the field can be left blank. An identifier can be added to future hardware batches at the time of approval.

     Changes to the batch field for tests that have previously been submitted can either be changed by the labs by re-submitting test reports, or changes can be made by TMC as long as written approval to do so is provided by each reporting test lab.
