1.0 Agenda Review

2.0 Review Test Progress

No progress on new testing as of today. T. Gottwald agreed to run both a TMC 134 and TMC 155 on the modified break-in procedure, and expects to be able to complete both tests prior to the May 15th meeting in Cranberry PA.

Discuss was had around the use of TMC 155 vs. TMC 155-1, but the group consensus was that given the prior data on TMC 155, and current inventory levels, to remain with running with TMC 155, however it was brought up that we will want to start looking at TMC 155-1 in the matrix as TMC 155 will run out in the future. Other Procedures have already made the switch, and have not seen differences so far.

4.0 Draft ASTM Procedure

C. Prengaman requested volunteers to review a first draft of a L-37-1 procedure. This is expected to take a while to dial in, however we want to ensure that all labs are similar enough that data can be properly compared to each other.

B. Koehler, S. Parke, T. Gottwald, D. Smith all volunteered to be a part of this initial review team.

C. Prengaman will distribute the draft to the group.

B. Koehler mentioned that based on his experience with prior procedural implementation, he expects we'll need a sit down meeting to specifically discuss the fine details at some point and come to agreement.

4.0 New Business

5.0 Adjournment

Motion to adjourn .

Respectfully Submitted
