L42 hardware update

Rings are through heat treat

Pinions are scheduled to go through the furnace on Thursday

Projection for shipment of rings/pinions scheduled for February 10th.

Dana 60 models are typically 8% fallout, 1000 pinion/ring blanks were received.

Drawings review:

Kenny sent out new drawings, on the morning of January 27th.

A few more changes were recommended:

Add Do not shot peen, Do not temper, Do not phosphate coat on gearset drawing 044GA103x.

Question:

AI: Ask Gene/Derek when the schedule is permitting to build off L42 axles.

Questions for Lugoff

Total time to build out? 9-10 days.

Build Start time if axles were shipped on February 10th.

AI: Derek to speak with Gene Lawrence about lab visits week of Feb 16th, and start build the same week. Kenny will be out of the office February 13th.

Did Derek receive axle from SWRI? Yes-have not had an opportunity to investigate.

Will do ASAP. Need to finish this prior to L42 axle build out.

Ballots:

L42 standard update/change to section 8. Chairman to send out this week.
