Cory Koglin
Brian Koehler
Rick Graziano
Dale Smith - PARC
Galen Greene
Kenny Miller
Don Lind - TMC
Derek Ottley

Location & Time:

3-3-2009
Teleconference
10:00am

LZ receive all of their axles
Afton received first shipment
SWRI didn't receive theirs yet

SWRI: shakedown axle is in the stand, calibration scheduled and maintenance being performed. Should start matrix around March 12th.

From pilot run, torques may need to be adjusted higher on shock2.

Afton: Broken spring. Need to replace

LZ: ready to start on runs anytime. Run a few 116's shakedown and then run matrix. Try to dial in tests early next week and start matrix late next week.

Brian to review initial torques on pilot batch and share with group (sent email 3-3-2009)
Springs

Brian contacted Hector and is finding the information on spring manufacture.

Kenny/Derek

Action Item: Extra tube delivery? What is estimated timing on tube delivery and build? Kenny to send email asking Derek (Done 3-3-2009)

Throttle:

Re-evaluate TB calibration and change wording in section 9 to eliminate confusion

Action Item: Chairman to come up with verbiage relating to modified throttle body and potentiometer. Share with Don Lind to tweak wording, and then share with group.
