

**Topic:** ASTM – L42  
**Location:** BRTCR (Warren, MI)  
**Date:** 05-11-2011  
2:06pm EST

**Attendees:** C. Koglin, B. Kearny, D. Bell, S. Higuchi, J. Dharte, A. Comfort, B. Koehler, T. Marougy, B. Dwornick, B. McGlone, J. Gropp, G. Greene, W. Venhoff, Kahlid, J. Zacharian, T. Miransky, D. Smith, S. Parke

**Agenda:** Batch Order  
Dry Ridge, KY meeting (05-04-2011) minutes overview, including action items that resulted from meeting. Fort Wayne will still manufacture rings and pinions. The parts will be ASSEMBLED in Dry Ridge.

**Attach 05-04-2011 meeting minutes.**

SwRI will run out of axles before new batch arrives due to late order.

Dale Smith will provide electronic contact pattern file (drive and coast) to Koglin/Koehler.

RCMS discussion

TMC can only handle three raters simultaneously due to low part quantity. Some raters don't pass on their first attempt. Time is required to receive additional parts to rate. Scott requests additional L42 parts from labs; preferably before July workshop.

TMC will review SwRI reference gears during LRI as potential parts.

Discussion of whether one set of gears from TMC is sufficient per lab.

Reporting

Paper to electronic reporting proposal.

B. Koehler: Motion to issue info letter to accept TMC standard to eliminate a paper copy of reference report to TMC. To be effective date of info letter.

D. Smith second motion.

Motion approved – unanimous.

Adjournment.
