Agenda:

TMC and I would like to have a conference call to discuss the upcoming L-60 gear matrix and referencing.

The idea is to basically get all of the labs on the same page.

Meeting topics:

- **Will everyone be testing hardware from the same bar? Or is everyone OK with each lab just randomly picking from what they currently have available?**
- **The results we currently have are on bar 66. So should we all use 66**
- **How many test do we need to run to reference the new gears**

Meeting Items :

- **The labs are going to run the Matrix on a referenced L-60 stand and use run # 10 and 11.**
- The labs are going to attempt to complete all the reference runs before the November 7th, 2018 ASTM Meeting.**
- The labs decided not to use the same bar to run the matrix on.**
- All the labs are going to run two test on TMC reference oil, and send the results to TMC. Then TMC will determine if more reference runs are required.**

.Action Items :

- **Send in the two matrix runs in before November 7th,2018 ASTM Meeting.**
