GM -	Zreik

Voting Members in **BOLD**

**1.0 TMC L601 Summary Severity Discussion**

- Severity slides presented by TMC
  - ACV and ASL industry severe. ACV more prominent than ASL
- Action Items
  - Is an additional correction factor needed?
  - Stats group involvement?
    - Travis will send email to stats group to initiate looking into severity
  - Modification of the 0.6 or separate CF if deemed necessary??
- Martin Chadwick thoughts
  - 2018 hardware 9 or more tests before big shift in severity
  - Any changes in that time frame?
  - Because of hardware 0.6 CF and standard of (.511) x 1.8 already a big correction
- Troy - Questions around steel and surface analysis
  - Case depth
  - Hardness
  - Porosity
- Troy - Agenda Item for all Surveillance Panels is to locate hardware Prints to all L-Tests
  - LZ to find Ohio gear transmission contact
- Rebecca recommendation of possibly using old hardware to run a couple donated tests
  - Intertek have a few
  - Afton to check on inventory

Respectfully submitted,

Kristijan Drjla  
L-60-1 Surveillance Panel Chairman
