BASF -	<b>Goyal</b> , Mosher
Dana -	
Meritor -	LaBond, <b>Carter</b>
Army -	<b>Comfort</b>
AAM -	
Oronite -	Martinez

Voting Members in **BOLD**

- Old hardware runs????
  - General concern of a total of 1.2 correction
  - Potentially doing further testing 2011 hardware
    - Do the Labs still have some 2011 hardware to do some donated runs
  - Reference oils both ACV are both high and relatively close 8.31 - 8.76 means
  - Need an oil closer to the pass/fail line 7.5ish
  - LZ may have an oil to possibly use for old hardware matrix
  - Start with current gear batch then old
  - Bonus points for borderline sludge
- Reference Oil 148-1??
  - Need a better discrimination oil
  - Only about 10 gallons left
  - Start thinking about next ref Oil

Respectfully submitted,

Robert Slocum  
L-60-1 Surveillance Panel Chairman
