

Oil Seal Compatibility Test (OSCT) Surveillance Panel Meeting Minutes

Teleconference

3/19/2013

D. Bell

Participants:

D. Bell (Afton)                      C. Knight (TEI)                      Z. Bishop (TEI)                      B. Grinfield (SWRI)  
J. Gropp (Lz)                              M. Duda (Lz)                              T. Marougy (Eaton)                      S. Parke (TMC)  
T. Muransky (Meritor)

The OSCT Surveillance Panel meeting was called to order at 2:00 pm 3/19/2013.

The qualification data shown in the Appendix from SWRI and Lz was reviewed for FL389 in TMC reference oils 160-1 and 169. All FL389 % elongation, % viscosity increase, and shore hardness values in both reference oils was found to be within the acceptance bands. A motion made by D. Bell and 2<sup>nd</sup> by B. Grinfield was unanimously (7 approvals) approved: Effective immediately, approve FL389 for ASTM D5662 candidate testing.

TEI was instructed to release the approved FL389 for sale.

A recent OSCT information letter 13-1 noted that the elastomer batches would be approved if all of the qualification data was within the acceptance bands. The Panel commented that the Chairman should continue to review all elastomer qualification data with the Panel for voting on approval with comments, and not simply consider the elastomer automatically approved if all parameters are within acceptance bands.

The meeting was adjourned at 2:08 pm on 3/19/2013.

Respectfully Submitted,

Don Bell
